# About us

## Mission

Magna Solutions mission is to support organizations with smart, reliable, and ready IT solutions. The company focuses on turning complex technological challenges into clear and effective systems that enhance efficiency, security, and scalability. Through strong technical expertise and a practical approach, Magna Solutions delivers IT solutions that create lasting value.

## Vision

The vision of Magna Solutions is to play a leading role in shaping the digital future of businesses. By embracing innovation, continuous improvement, and responsible use of technology, the company aims to set high standards in the IT industry. Magna Solutions envisions technology as a driving force for sustainable growth, clarity, and long-term success.

# Managed Private Cloud

As a managed private cloud provider, we deliver a secure and fully dedicated cloud environment tailored to the specific needs of each organization. Our solutions give businesses full control over their data, infrastructure, and compliance requirements, while removing the complexity of daily cloud operations. By managing the platform end-to-end, we ensure stability, performance, and continuous optimization.

## Key Benefits

As a managed private cloud provider, we deliver a secure and fully dedicated cloud environment tailored to the specific needs of each organization. Our solutions give businesses full control over their data, infrastructure, and compliance requirements, while removing the complexity of daily cloud operations. By managing the platform end-to-end, we ensure stability, performance, and continuous optimization.

sovereignty

In addition, a managed private cloud provides greater flexibility and transparency compared to public cloud models. Costs are predictable, resources are allocated based on actual needs, and changes can be implemented in a controlled manner. This results in a stable IT environment that supports long-term growth, reduces risk, and aligns closely with business and regulatory requirements.

Control

Reliability

# Data & Storage

Scalability

Resilience

## Reliable Storage

Data & Storage form the foundation of a reliable and secure IT environment. We provide scalable storage solutions designed to handle growing data volumes while ensuring high performance and availability. By combining modern storage technologies with structured data management, organizations gain faster access to critical information and improved operational continuity.

## Value and Control

As a managed private cloud provider, we deliver a secure and fully dedicated cloud environment tailored to the specific needs of each organization. Our solutions give businesses full control over their data, infrastructure, and compliance requirements, while removing the complexity of daily cloud operations. By managing the platform end-to-end, we ensure stability, performance, and continuous optimization.

Resilience

Flexibility

# Consultancy

Optimization

Guidance

Expertise

IT Consultancy helps organizations make well-informed technology decisions that align with their business objectives. By providing clear advice and practical direction, it enables companies to use IT as a strategic asset rather than a technical challenge.

Advisory

Roadmapping

IT Consultancy also provides clarity in complex and rapidly changing IT landscapes. By translating business needs into practical and scalable solutions, organizations gain better control over their technology, reduce risks, and ensure that IT investments deliver real and measurable value.

Through in-depth analysis, expert guidance, and a strong understanding of both technology and business processes, IT Consultancy supports organizations in optimizing their IT landscapes. From strategy and architecture to implementation and improvement, consultants help reduce complexity, improve efficiency, and future-proof IT environments. This results in clearer roadmaps, better decision-making, and technology solutions that truly support long-term business goals.

“Connecting people and data by innovation”

# Connectivity

Rapid Deployment

Global Coverage

## Rapid Deployment and Reliability

Our connectivity solutions are built for speed, resilience, and ease of use. With plug-and-play designs like the Magna Connectivity Kit, organizations can be online within minutes, even in the most remote or challenging environments. Built-in redundancy, failover mechanisms, and multi-uplink support ensure continuous connectivity and high availability, minimizing downtime and operational risk.

Resilience

Remote Access

Always-On  
Connectivity

Connectivity is the backbone of modern operations, especially in environments where traditional infrastructure is limited or unavailable. Magna Solutions delivers flexible and secure connectivity solutions designed for rural areas, maritime operations, temporary deployments, and mission-critical locations. Through a hybrid multi-sourcing approach, we combine technologies such as satellite, 3G/4G/5G, Starlink, and fixed WAN connections to guarantee optimal coverage and performance — anywhere in the world.

For more information, please refer to our whitepaper.

# Artificial Intelligence

Secure AI

Controlled Environment

## AI with Control and Responsibility

Artificial Intelligence offers enormous potential, but using public AI platforms often means losing control over sensitive data. Inputs such as documents, insights, and confidential information are processed and stored outside the organization, frequently in foreign data centers. This lack of transparency raises serious concerns around privacy, ownership, and long-term use of data.

## A Secure and Isolated AI Environment

Magna Solutions provides an isolated AI environment where organizations retain full control over their data. All information remains within the organization's own infrastructure, without automatic connections to public cloud platforms or external AI providers. Access, storage, and processing are clearly defined and strictly managed, ensuring that AI supports operations without compromising security or compliance.

## Ethical AI Built on Trust

Our approach to AI is built on responsibility and respect for the user. We believe AI should serve people and organizations, not exploit their data. By combining secure infrastructure, scalable computing power, and clear governance, Magna Solutions enables organizations to use AI with confidence, knowing their data, insights, and future remain firmly under their control.

AI DEVELOPMENT

# High performance network

Latency

Segmentation

## The core of digital communication

The network is the core of every IT environment, enabling communication between users, systems, and applications. A stable and well-designed network ensures that data flows efficiently and securely, supporting daily operations and critical business processes without interruption.

## Built for security and continuity

Our approach to AI is built on responsibility and respect for the user. We believe AI should serve people and organizations, not exploit their data. By combining secure infrastructure, scalable computing power, and clear governance, Magna Solutions enables organizations to use AI with confidence, knowing their data, insights, and future remain firmly under their control.

## Managed and Future-Ready

With centralized management and clear visibility, organizations maintain full control over their network infrastructure. Scalable designs allow the network to grow alongside business needs, making it ready for new technologies, locations, and increasing demands, without compromising stability or performance.

# Industries

Industry

Healthcare

Maritime

Government

Transport &  
Logistics

Start-ups

## Solutions Tailored to Every Industry

Magna Solutions supports a wide range of industries, each with its own challenges, regulations, and operational demands. By understanding the specific context of every sector, we deliver IT, connectivity, and infrastructure solutions that truly fit the environment in which they are used. From mission-critical operations to fast-growing digital businesses, our solutions are designed to be secure, reliable, and scalable.

## Technology Built for Your Industry

In Industry, Maritime, and Transport & Logistics, continuity and availability are key. These environments often operate in remote or challenging conditions, where stable connectivity and resilient infrastructure are essential. For Healthcare and Government, data security, compliance, and privacy play a central role, requiring controlled and trustworthy IT environments. Start-ups benefit from flexible, scalable solutions that support rapid growth without unnecessary complexity. Across all branches, our focus remains the same: enabling organizations to operate efficiently, securely, and with confidence.
